10.15am **Welcome to the Seminar**

10.20 am **Operator Compliance Risk Score** – This presentation will explain the operational issues and what supervisors and managers need to be aware of in operating their municipal fleet of vehicles and equipment - *Paul Watkins, VOSA*

10.50 am **Vehicle CCTV – reducing insurance costs** – Operators are becoming aware that new technology can help protect their crews, the public and help reduce insurance costs. This presentation will outline the various products and give particular attention to vehicle CCTV systems with live video transmission over 3G - *Richard Marsh, Vision Techniques (UK) Ltd*

11.20 am **Fuelling Change – Creating Diesel from End of Life Plastic** – SITA UK and Cynar Plc have signed a landmark deal to produce millions of litres of diesel fuel each year from waste plastic that cannot be recycled. Planning permission is currently being sought to build one of the 10 plants at Avonmouth. This presentation will explain the process, the types of waste plastic inputs and the quality and type of outputs from the process - *Jean-Claude Sartenauer, SITA UK*

11.50 am **Technical Developments in Waste/Resource Collection Vehicles** - Dennis Eagle will look at the current developments in waste/resource collection vehicles in terms of configuration of bodies, alternative fuels/power systems, electronics etc. They will also provide a glimpse into their crystal ball to see what the future is likely to bring. *Dennis Eagle*

12.20 pm **Q & A** Session with speakers

12.45 pm **Lunch** will be served
